DMX USB Pro

Supported by dozen of software titles !

Born of the Open DMX USB, the DMX USB Pro represents a significantly more robust way to control lights from your computer. It is light-weight, portable, and ready for professional applications.

It can be used for output, to control lights, or as input to allow DMX data from another source to interact with various programs on your PC. On-board chips handle timing and signal processing, so you get a clean signal no matter what your PC's processor is up to.

► Features

- **USB 2.0 Support** on Windows PC and Apple OSX
- **1500 V full isolation** data & power lines
- **Input or Output** mode
- RDM enabled
- Internal frame buffering for steady DMX generation
